Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a first action on the merits of application Serial No.10/662,102, filed September 12, 2003.

Claim Objections

Claim 5 is objected to because of the following informalities: In line 1 of claim 5, "wherein second control valve" should be – wherein a second control valve --. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no proper antecedent basis for "the chamber", line 5 of claim 13. Apparently "the chamber" in line 5 should be –a chamber– and "a chamber" in line 6 should be –said chamber--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3681

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemieux et al.('206). The Lemieux et al. device discloses a system including a source of line pressure 24, a control valve 100 connectable to line pressure and exhaust pressure and for producing control pressure in a forward state, and a friction element 38 connected to line pressure in a reverse state and at least indirectly connected to the control valve in the forward state. Second control valves are provided at 180 and 220 and a second friction element is provided at 36. The "source of exhaust pressure" is provided by the transmission sump. The manual valve having first, second, third, and fourth outlets and first, second, and third lands is provided at 350.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujimine et al.(US 2004/0067810 A1), Moan('805), Kirchhoffer et al.('445), Hamano et al.('708), Mainquist et al.('592), Ortmann('584), and Morishita et al.('150) show other fluid control and actuation systems.
